AFTERGLOW

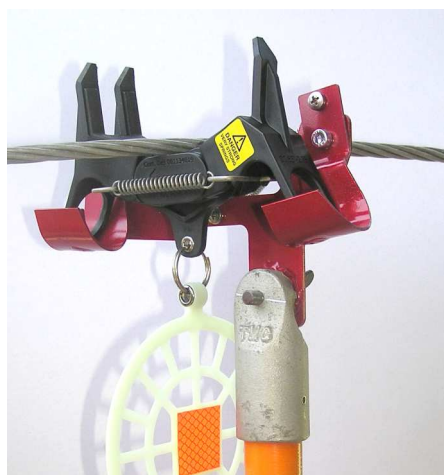

Emits ultra violet light which birds see brightly

REDUCE OUTAGES ON OVERHEAD LINES DUE TO BIRD STRIKE

- * Protects birds from flying into conductors by making the wires visible
- * Birds notice the UV emitting roundel and focus on it. Then the birds see the wires, then the conductor and they veer away.
- * The afterglow can be fitted from the ground with a hotstick and a simple tool
- * The reflective patch glints in the sun or moonlight
- * The AG glows in the dark at dusk and dawn when the birds fly
- * Can be attached to any size conductor or ABC or steel angles

Glows at night

Fitting to overhead wires with application tool

The bird flight diverter is made from long lasting UV resistant materials with stainless steel rings & clips. The strongly sprung 3 finger clamp has been proven in use world wide for 20 years and will attach to hi voltage power conductors, ABC, earth wires, stays and guys, steel angle, pipes etc.

APPLICATION & REMOVAL of AFTERGLOW & FIREFLY

with Red Application Tool 1024 .

APPLICATION

STEP ONE

PULL THE ON THE RINGS
UNTIL THE CLAMP STAYS OPEN

2

3

1

STEP TWO

PULL THE LEVER DOWN

FIGURE 1

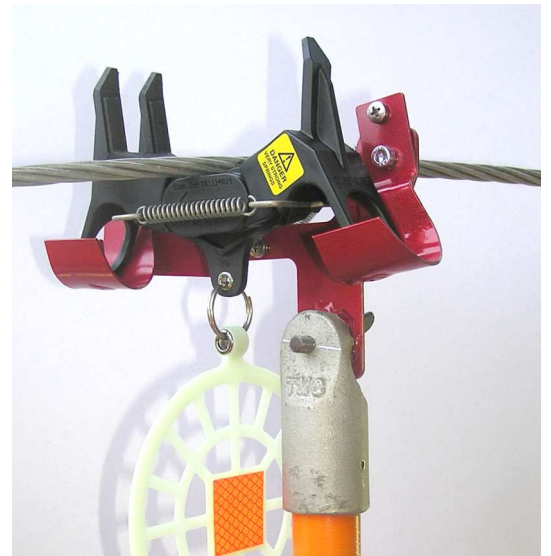

POSITION THE SNAP CLAMP WEB
BETWEEN THE TOOL SIDES

FIGURE 2

THEN ROCK THE CLAMP TO THE LEFT
UNTIL THE FINGER RING GOES OVER

THE PEG IN THE CUP AT THE TOP

FIGURE 3

STEP THREE

POSITION THE CLAMP UP
UNDERNEATH THE CONDUCTOR
AND PUSH UP QUICKLY
CAUSING IT TO SNAP SHUT

REMOVAL

PUT HOOK THROUGH ONE OF THE FINGER RINGS ON SNAP CLAMP
PULL DOWN UNTIL IT OPENS

THEN LIFT UP SO THAT IT SLIDES ONTO THE HOOK TOOL OR FALLS
TO THE GROUND
